Summary

Product Manager with strong expertise in product analytics, driving data-informed decisions across EdTech, FinTech, and AI products. Skilled in experimentation, user behavior analysis, and cross-functional execution to improve engagement and business outcomes. Passionate about building scalable fintech solutions that simplify complex user experiences.

Work Experience

Airlearn (Unacademy Inc.)

Jan 2026 - Present

Product Management Intern

Indiranagar, Bengaluru

- Delivered actionable analytics insights influencing product, design, and growth decisions; boosted engagement by 12%.
- Tracked feature adoption, retention, and engagement daily using Amplitude and Metabase, ran RCA on drop-offs and bugs, and brought findings to product reviews to inform prioritization.
- Ran feature experiments and campaigns across push notification and email, writing copy, segmenting cohorts, and improving key retention metrics including a 10% lift in user resurrection.
- Collaborated cross-functionally on Chess and AI Speaking Lessons across the full product lifecycle, from research and scoping through launch and post-release tracking.

Physics Wallah (PW)

Jun 2025 - Dec 2025

Product Management Intern

Bengaluru, Karnataka

- Design account-based product lifecycle – from ideation to user stories, design, co-ordination in FinTech, Sales, social media, EdTech products
- Collaborated with cross-functional teams (engineering, design, marketing, and growth) to deliver high-impact features, improving user engagement and retention.
- Designed and documented Product Requirement Documents (PRDs), user journeys, and wireframes, Prototypes ensuring seamless communication between design and development.
- Conducted stakeholder discussions to align on business goals, feature prioritization, and go-to-market (GTM) strategies)

Projects

QueryBee AI | <https://querybeeai.vercel.app/>

- Built an AI-based tool that lets users upload data files and ask questions in plain language to get quick insights and reports.
- Created QueryBee Crafter, a button-based tool that helps users clean, transform, and analyze data easily without using complex Excel formulas.
- Worked with designers and developers to plan features, design user flow, and test the product-making data analysis 40% faster and simpler for users.

NuroTrader - Analytical & Autonomous AI agentic tool in web3 | <https://nurotrader.vercel.app/>

- Developed a analytical & AI Agentic platform which combines capabilities of AI & Account abstraction (ERC-4337)
- Executes trades with autonomously & efficiently with 0xgasless agentkit, paymaster and bundler with sentiment analysis from Onchain & Offchain data analysis
- Secured place in 3rd Rank list of 0xgasless by Avalanche chain hackathon organized by 2:47pm studios

MegaMart Data Analysis & Business Model Comparison

- Conducted an in-depth comparative analysis of MegaMart vs. other hypermarts, online/offline marts, leveraging financial reports, market trends, and user traffic data.
- Utilized Power BI to create 15+ interactive visualizations, identifying key revenue streams, growth opportunities, and customer behavior patterns.
- Proposed data-driven strategies to optimize pricing, inventory management, and customer engagement, potentially increasing revenue by 12-15%

Educational Background

Indian Institute Of Technology, Guwahati

Oct 2023 - Present

Bachelor of Science (BS), Data Science and Artificial Intelligence

Guwahati

- **Coursework:** Data science & AI, Machine Learning & Deep Learning, Data analysis, Financial Evaluation and Portfolio analysis, Recommendation Systems, Data modeling and visualization
